2. The Scenery

The scenery is based on public available information and maps. The objects were completely rebuilt.

The package includes night textures and realistic lighting (X-Plane 10 only).

charts

can be found at <http://www.flugunion-seitenstetten.at>, but are also included in this package.

To use the PCL function, either a plane with standby ADF2 or the LUA script on <http://www.x-plane.at/drupal/node/247> is required.

To switch the parked aircrafts, either a plane with standby ADF2 or the LUA script on <http://www.x-plane.at/drupal/node/242> is required.

3. Functions (summary)

- Photorealistic scenery
- Compatible to "OSM+autogen" or. "Osm_Austria_beta3.1" by PilotBalu
- Realistic ground texture on the airport area
- Parkpositions, taxiways, runways, etc. conform to the Charts
- parked aircrafts on the apron removeable for online-flying
- openable hangar doors (with [HangarOps Package](#)) *)
- PCL (Pilot Controlled Lights) *)
- Night textures and realistic lightning *)
- ATC-Taxilines for AI-Traffic *)

*) X-Plane 10 only!

4. Installation

Simply unpack the scenery-folder and copy the content into your 'custom scenery' folder of X-Plane. Restart X-Plane and enjoy.

For the operation of the hangar doors the addon "HangarOps Package" from BlueSideUpBob is needed (see Credits).

If the PCL function should be used via the LUA script, the script has to be copied to the "Scripts" folder in the directory "FlyWithLUA".

If you want to witch the parked aircrafts on and off via the LUA script, you have to copy it to the "Scripts" folder in the directory "FlyWithLUA".

5. Recommended settings

To visualize all light effects, HDR should be activated. The higher the settings for "texture resolution" and "airport detail" the better the quality of the scenery but the more affect on the FPS ratio.

"runways follow terrain contours" has to be OFF!

6. Necessary software

X-Plane® Version 10.25+ or 9.7

Austrian X-Plane Design Group

7. Hangartore

The doors of the hangar can be opened and closed with "KEY-Code = 0" of the STMA HangarOps-Plugin.

8. Comments for the X-Plane 9 version

Unfortunately some functions of the scenery must be disabled for X-Plane 9 and therefore it will not look like on the pictures which were taken with X-Plane 10.25.

9. Used Libraries

none

10. Recommended addons

Although the scenery will work without any addons, we recommend to use the following ones for the whole experience (pictures taken with addons installed):

OSM Europe osm+autogen by PilotBalu.

Download from: http://simheaven.com/?page_id=23

to have streets and buildings from OSM and autogen where there is no coverage of such data.

or

Osm Austria beta3.1 by PilotBalu

Download from: <http://simheaven.com/experimental/>

HD Mesh Scenery v2 by alpilotx

Download from: <http://www.alpilotx.net/downloads/x-plane-10-hd-scenery-mesh-v2/>

Europe Library von LyAvain.

Download from: http://simheaven.com/?page_id=14

to see European instead of US buildings.
